

TF Co-Activity Networks (top 40 TFs, 60 strongest |corr| edges/stage)

AIS: 60 edges

invasive: 60 edges

Edges: AIS=60, invasive=60 (+0 change). Node size ~ mean activity, color ~ $\Delta(\text{AIS-AAH})$. Edge: red=positive corr, blue=negative corr, width=|corr|. Descriptive co-activity network (NOT causal GRN; SCENIC motif-based GRN is future work).
